

Daniels Manufacturing Corporation is proud to be your resource for high-reliability precision crimp tools.

Our 23 Series heavy-duty 4 indent crimp tools deliver unrivaled performance in three power types suitable for all production environments. These tools provide enough crimp force to crimp contacts and terminals 8 to 4/0 AWG!

3 Power Types to Choose From

In Stock!

PNEUMATIC

Simplify high production crimping with the WA23. This tool features a full-cycle control system, engineered to produce quality, precision crimps in just 5 seconds.

- Mil-Qualified (M22520/23-01)
- In Stock!

WA23

BATTERY

The new and improved HDE23C is the battery-operated alternative to the WA23 ideal for field use. This tool features an improved ergonomic construction, data transmission via Bluetooth, and app-enabled crimping data storage.

HDE23C

MANUAL HYDRAULIC

This self-contained manual hydraulic tool provides an ideal solution for crimping large gauge wire in places battery and compressed air tools can't go.

- Mil-Spec Pending

HD23

MIL-QUALIFIED DIES

Choose from dozens of pre-designed Mil-qualified dies and locators or have our team custom engineer solutions specifically for your application. All dies and locators are interchangeable between tool types.

Dies & Locators

We are happy to assist you in finding the right tool for your application. For questions about our crimping capabilities contact the account executive in your area.
