

IN-DEPTH TECHNICAL RESOURCES

Cutting-edge and scalable electronics equipment solutions for test and measurement applications

Evaluating the right **electronics protection solution** to protect sensitive components in a test system is critical. Find more information about nVent SCHROFF [product portfolio](#) for test and measurement applications as well as a selection of in-depth technical information about our mechanical solutions, test reports, certifications and much more.

Quick links to:

- [Selection of test reports for EMC, mechanical stress test, etc.](#)
- [Comprehensive certifications e.g. ISO 14001:2015](#)
- [Guided 3D CAD configurators for front panels, subracks, and electronics cabinets](#)
- [CAD files in 32 different file formats available on Traceparts](#)
- [Library of product catalogs and other helpful resources](#)

From electronics cabinets to small system cases, nVent, a pioneer in 19" technology for over 5 decades, provides the right infrastructure for test and measurement equipment as well as simulation applications.

Kind regards,
nVent SCHROFF
