

## COMPANY

T&G Nordic Oy is a Finnish company whose roots go back to 1967. Our company has reached its current form in 2017 when two players in the technology industry joined forces. We are located in Nummela, Uusimaa and employ 30 people.

Today, we are part of an international group of independent companies, which in addition to Finland are T&G Elektro AS (Norway), RSG Connexion AB (Sweden), Technokontakt (Poland), T&G Lanka Ltd. (Sri Lanka) and BGH Inc. (USA).

Thanks to our international network, we can offer to our customers a wide range of high-quality products.

We are a member company of *Association of Finnish Defence and Aerospace Industries (AFDA)* and *The Suppliers of Electronic Instruments and Components Association (ELKOMIT)*.

## MAIN INDUSTRIES

Our main industries are defense and security, industrial automation, and components.

Main Industries

Defense and Security	Automation	Components
Connection systems made of copper, fiber and hybrid. For even the most demanding conditions.	Automation applications with HW and SW support.	With factory contracts directly from the original manufacturers.

## OUR VISION

Our goal is to be a reliable and high-quality partner for both small and large customers. We solve the customer's problems creatively. We want to operate, succeed, and grow alongside our customers. We stand by our customers even in difficult times.

## PRODUCTS AND SERVICES

### *Subcontracted production*

We do assembly work for automation and switching systems, including limited SW support. We offer design support, component procurement, assembling and testing.

We have our own 1400m<sup>2</sup> production and storage facility.

### *Cable sets and connection systems*

We manufacture cable sets and connection systems. The products are manufactured according to the customer's quality requirements and technical specifications to withstand even the most demanding conditions if necessary. The products are manufactured according to the customer's needs either in copper, fiber or in a hybrid version. There is a wide selection of different connectors in markets to choose from for the products. The cables are tested, equipped with markings, and packed according to the customer's needs.

### *Equipment and electronics cabinets*

We sell and import NVent-Schroff's high-quality, MIL-classified equipment and electronics cabinets and frames that provide reliable protection for critical systems on land, at sea, in the air and in space.

## Connectors and adapters

MIL and industrial connectors and adapters from almost all original manufacturers including accessories such as protective caps are available through us. Copper, fiber, and hybrid versions. If necessary, we can also make custom designed and manufactured connectors according to the customer's needs.

## Special tools

We sell and import high-quality special tools from Daniels Manufacturing Corporation (DMC) in the USA.

Crimp Tool

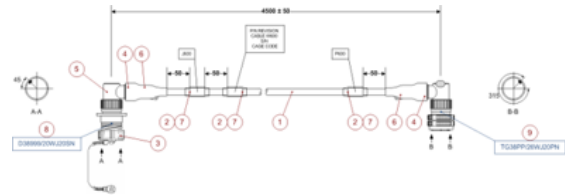

## Components

We import electromechanics and electronics components from several manufacturers.

## Design support

If necessary, we support the customer in product design. He is assisted by our mechanical, electrical, electronic and logistics designers. If the customer wants it, we can offer him a complete package; product design, selection and procurement of components that suit to the customer's needs, product manufacturing, testing and documentation, and delivery to the desired location.

## QUALITY

The high quality and reliability of operations and products are important to us. That's why we follow the most common domestic and international quality standards. Our companies have the following quality certificates and standards to follow

### Here in Finland

- Business security clearance certificate
- 2019 KATAKRI 2015, levels III-IV, FSCC (Facility Security Clearance Certificate)
- ISO 9001:2015 certificate
- In cable manufacturing, we follow
- IPC/WHMA-A-610 and 620 standards
- In the central assembly, we comply
- IEC61439 standard

### In our sister companies

- QPL MIL-C-38999 (MIL-STD-790)
- ARINC
- 851 (MIL-C-26482 ser. 1)
- AS 9100D (EN 9100:2018 / JISQ 9100:2016)
- ECSS-Q-70-51A (European Cooperation for Space Standardization, Space Product Assurance – Termination of Optical Fibers) Draft

### *Health, safety and environment*

- Global Compact / Corporate Social Responsibility UN (2013 qualification)
- Responsible material recycling
- Renewable solar energy is used in several of our factories, also in Nummela
- In our production and operations, we comply with national and international laws and regulations such as environmental legislation, fire regulations and handling of explosives, working conditions, RoHS, WEEE and so on.
